Did you know?

The wild Haggis (plural: Haggi) lives in the highlands of Scotland. It is round, four-legged, fur-covered, and usually less than a foot in length (about the size of a grouse). It is a shy creature, rarely seen, many who claim to be Haggis experts say that the legs of the Haggis are longer on one side of its body than the other, in order to allow it to better stand on the steep slopes of the highlands. This means the haggis can only run around hills in one direction, and to catch one you simply run around the hill the opposite way

Isn't it great to see some places starting to get back to normal after the December floods? Whilst there are still a lot of people working very hard to get their homes ready to move back into, quite a few businesses are starting to re open... including our Thursday Lunch Club venue, the Hungry Horse which reopens on Tuesday 12th April. Here are some photos of the work being done to get the restaurant ready.

DON'T forget TO REMEMBER!

The Friday Lunch Club at the Weatherspoon's pub, The Dog Beck in Penrith, is on April Fool's day 1st April

If you have some news or a story you would like to see in the newsletter why not send them in by email to: catherine.arabi@glenmore.org
